

FARM ITEMS.

The first strawberries from Southern Illinois reached Chicago May 12, and sold at \$2 a quart.

This Spring, a cherry tree near Boston, blossomed May 11. In 1775, the same tree blossomed April 9.

To prepare the ground well for one crop does a good deal of the work required for the next one. In the same way is the human race improved.

The best strawberry plants are said to come from the third and fourth set of runners. The first and second are to be cut off.

A hen never lays more than 600 eggs, whatever may be the size. Some lay the whole in three years; others won't more than two.

In California, farming has become more profitable than mining, for it has been discovered that costs \$1 in labor to dig one dollar in gold.

The fruit-growers of Vineland, N. J., have started a horticultural paper called "The Farmer's Friend," which looks nice and is good reading.

It is beginning to be understood that the best stock, either for milk or beef, results from breeding the best natives with the foreign on one's own farm.

One cattle ranch in Texas is 50 miles in extent; the number of head is 100,000, and 20,000 are sent to market every year, enough to supply the New-York market 6 weeks.

Already Americans have better fruit than any other people, because if one has a choice variety, it is immediately propagated through the country, and each is its own manager and laborer.

The Agricultural Society of Honolulu, Sand-wich Islands, grows poultry and seeds of all kinds with the Japanese. Their main crop is sugar, which is sent to San Francisco, and flour, calico, linery, novels, and other luxuries, are received in return.

A Western widow, handsome and learned, manages a large farm, and she raised last year 1,000 bushels of wheat, 1,000 bushels of corn; has a large stock of hogs, sends fat cattle to the New-York market, has abundance of flowers, apples, pears, strawberries, and currants, keeps up with current literature—does not want to marry.

The California Farmer of April 16, says that hay-making has already commenced, and that strawberries and green peas are in the market. It takes off the bloom a little to add that the strawberries were \$2 a pound. Eight days later, they were 50 cents a pound. The Juncunda, or "300," is taking the lead.

GET THE BEST.

GEN. GRANT'S LIFE.

We know that sooner or later, the true writer would appear, and relate the true story. We have not yet waited very long, for the work which we have set down above, is honest, able, and accurate to a degree.—*Washington Chronicle.*

D. APPLETON & CO.,

No. 90, 92 & 94 GRAND-ST.

MAY JUST PUBLISHED.

THE MILITARY HISTORY OF ULYSSES S. GRANT,

BY ADAM DABAR.

Colonel, and Aide-de-Camp to the General-in-Chief, Brevet Brigadier-General United States Army.

Volume I. With Portrait and numerous Maps. \$600 pages. Price, \$4.

"The fact that I became a member of Gen. Grant's personal staff before he assumed command of the armies of the United States, and that I have since remained with him, is the reason that I offer for the correctness of this history. I have not meant to state one fact, unless it came under my own personal observation, or has been told me by the General of the Army, or one of his important officers, or unless I know it from official papers. When I deviate from this rule, I make the deviation known."

G. F. PUTNAM & SON'S NEW BOOKS FOR MAY.

A STORY OF THE MORAVIANS.

MARRYING BY LOT; A TALE OF THE PRIMITIVE MORAVIANS.

By CHARLES L. NORTON.

BY RUSSELL BROS.

NO. 30 and 32 Nassau-st., N. Y.

THE AMATIC RACE.

REPLY TO

"Ariel." Dr. Young and Blake, on the Negro.

"The Negro does not belong to the Atlantic Species"—He is NOT a descended race and he is not a beast; he is a Human Being.—He has an equal right to life, liberty, and the pursuit of happiness.

IMAGE OF GOD"—And every attempt to civilize him, AFTER his speedy and certain destruction.

This little book tells bold ground on the subject of the origin of the race of men, and proves it by the Bible, preface history, and the agency of God.

The words you see are different from most authorities, but they are the words of clear sense.

The proof is conclusive, and will produce an entire change in our ideas respecting the origin of the different species of men.

PRICES 25 CENTS.

FOR SALE BY NECESSARIES.
